

DRUMBOX SOSPENSIONE

DESIGN DIESEL /2011

Inspired by the lamps used on photo sets, Drumbox affords absolute versatility, technology and fashionable style. It can be positioned and used freely, in whichever way you please: as a table lamp, a suspension or a floor lamp, stand-alone or in multiple compositions on a single tubular metal stem, in the most diverse settings. Its materials originate from the world of technical clothing: linen treated to become highly reflective, yet also warm and suggestive owing to its folds, teamed with non-tear super lightweight nylon, with heat sealed seams as on deep-sea divers' wetsuits. Drumbox is a table lamp with a fabric-covered wire frame structure. There are two variants available: white for a diffused luminosity, customised by a fluorescent yellow sign, or grey for a more marked contrast between the weft of the fabric and the beam of light.
