

GRAF TERRA

DESIGN DIESEL /2009

The floor lamp Graf Graf speaks the language of images. The lampshade features the graphic style elements representing the concepts that have inspired the entire home collection, through images especially created with a highly original graphic treatment and a scale of representation that is different according to the version. Made of fabric and chrome-plated metal, it's available in suspension, floor and table versions. The light has a warm, discrete, almost intimate appeal and creates a soft effect. Pull switch.
