low-down media cabinet

The Low-Down Media Cabinet is the perfect storage solution for modern electronics. Low to the floor, the height of the cabinet is ideal for TV viewing, and the interior shelves provide concealed storage for unsightly stereo components and cable boxes. An optional media drawer is designed to hold DVDs, CDs and other media. The interior and back are perforated with vent and cord chase holes. Front sliding doors are made of white acrylic, and wood doors are available upon request. This piece is available in rift-sawn white oak or walnut, and custom materials and finishes are available upon request.
