

Three Skin Chair

Ron Arad
2004

Description

Armless chair. 3D bent laminated beech plywood with copperwood and ironwood veneers, with clear catalyzed finish; or white, red or black high gloss lacquer finish.

A sensuous combination of veneers, the Three Skin Chair is a study of form and contrasting tones. In its lacquered version, the chair is pure form and energy. It is a functional object with the natural warmth of wood and a shape that follows the body's contours.
