

INNERLIGHT

DESIGN SIMON PENGELLY/2012

Innerlight was conceived as a wall sculpture, which once lit comes to life and transforms into an elegant platform for the light. Composed of three overlapping bands, Innerlight is available in two versions: white, or in a particular textured finish. Ideal both for the home and contract use, Innerlight displays its dual personality wherever it is: wall sculpture and lamp, it's always characterised by its pared down, decisive style and its simple elegance.
