

Frank Gehry

The most celebrated architect working today, Frank Gehry has single-handedly changed conventional ideas about architecture. Gehry's unique vision has brought him numerous honors, including the 1989 Pritzker Prize, the 1998 National Medal of Arts Award, the 2000 American Institute of Architects Gold Medal. Yet he does not rest on his laurels.

With his original and controversial vision, he continues to take creative risks and to transcend the boundaries of architecture.

"This is the beginning of an exploration." Frank Gehry
